### **Personal Information**

Birthdate: 15 October 1990

Citizenship: USA

### **Education**

Rice University Houston, TX USA

Doctor of Philosophy in Physics

o Thesis: Modeling Hot Plasma in the Solar Corona (working title)

o Advisor: Stephen Bradshaw, Ph.D.

Rice University Houston, TX USA

Master of Science in Physics, GPA: 3.88/4.00

Baylor University Waco, TX USA

Bachelor of Science in Astrophysics, GPA: 3.89/4.00 2009–2013

o Minors: Mathematics, Great Texts of the Western Tradition

o Magna Cum Laude, Phi Beta Kappa, University Honors Program

o Thesis: Astrophysical Applications of Dusty Plasma Physics, Advisor: Lorin Matthews, Ph.D.

# **Computing Skills**

**Languages**: C/C++, IDL, Mathematica, MATLAB, Python **Software Tools**: git/GitHub,  $\LaTeX$ TEX, SLURM, TORQUE

Operating Systems: Linux, Mac OS X

# **Research Experience**

Rice University Houston, TX

Graduate Research Assistant, Advisor: Stephen Bradshaw, Ph.D.

Research assistant in space physics division of the Department of Physics and Astronomy, Rice University. Research duties concentrated in computational solar physics. Teaching duties include, but are not limited to, a minimum of four semesters of leading lab sections of introductory physics.

# CASPER, Baylor University

Waco, TX

2013-present

expected 2018

2013-2016

NSF REU Research Fellow

June 2012-August 2012

Accepted to National Science Foundation Research Experience for Undergraduates program in the Center for Astrophysics, Space Physics, and Engineering Research, Baylor University. Studied the effects of dust grain charging on aggregate size in a protoplanetary disk. Numerical work in extending kinetic model of grain growth to examine effect of disk location on grain charging.

Baylor University Waco, TX

Summer Undergraduate Research Assistant

June 2011-August 2011

Awarded a Summer Undergraduate Research in Physics (SURPh) grant from Department of Physics, Baylor University. Conducted research on anomalies in Saturn's F Ring by improving numerical models that simulate perturbed orbits of charged dust grains in a plasma environment.

# **Research Interests**

Broadly, my research interests are in solar physics, specifically in the numerical modeling of plasma dynamics in the solar corona. I am interested in using hydrodynamic models to study nanoflare heating in the corona and how these modeled results can be compared to observations from instruments. Additionally, I am interested in using forward modeling to explore how novel machine learning techniques might be used to extract heating properties from active region core emission.

### **Publications**

- W.T. Barnes, P.J. Cargill, and S.J. Bradshaw, *Inference of Heating Properties from "Hot" Non-flaring Plasmas in Active Region Cores I. Single Nanoflares*, submitted, 2016
- o **W.T. Barnes**, P.J. Cargill, and S.J. Bradshaw, *Inference of Heating Properties from "Hot" Non-flaring Plasmas in Active Region Cores II. Nanoflare Trains*, in preparation, 2016

### Talks and Posters

**Space Physics Seminar Series** 

Houston, TX

Rice University 9 November 2015

Talk title: Impacts of Two-fluid Effects on Emission from Impulsively Heated Coronal Loops

Coronal Loop Workshop VII

Cambridge, UK

Unversity of Cambridge 21-23 July 2015

Poster title: Effects of Ion Heating on Emission Measure of Coronal Loops in Active Region Cores

**Triennial Earth-Sun Summit** 

Indianapolis, IN

American Astronomical Society 26-30 April 2015
Poster title: Nonnegative Matrix Factorization as a Method for Studying Coronal Heating

44th Annual Lunar and Planetary Science Conference

The Woodlands, TX

Lunar and Planetary Science Institute

18-22 March 2013

Poster title: Dust Grain Growth in a Protoplanetary Disk: Effects of Location on Charge and Size

Texas Undergraduate Astronomy Research Symposium

College Station, TX

Texas A&M University

14 September 2012

Talk title: Dust Grain Charging in a Protoplanetary Disk

# **Honors and Awards**

- Studentship Travel Award for 2015,2016 SPD Annual Meeting, Solar Physics Division of the American Astronomical Society
- o Dean's List, 7 of 8 semesters, Baylor University
- o President's Gold Scholarship (GPA of at least 3.0, 12 semester hours), all semesters
- o Gordon K. Teal Scholarship, 2 academic years
- o Herbert D. Schwetman Scholarship, 2 academic years
- o 2013 URSA Scholars Week Outstanding Research Poster in Physics

# **Teaching Experience**

#### PHYS 102: Electricity and Magnetism

Lab Teaching Assistant

Spring 2014, Spring 2015

Instructed lab sections of 40+ undergraduate students on topics including electrostatic interactions, magnetic induction, and basic circuits.

#### PHYS 101: Mechanics

Lab Teaching Assistant

Fall 2014, Fall 2015

Instructed lab sections of 40+ undergraduate students on topics including kinematics, collisions, and simple harmonic motion.

# **Societies and Associations**

## Alpha Lambda Delta

National Honors Society

April 2009-May 2013

Completed 10 hours of service per semester.

#### Alpha Phi Omega

National Service Fraternity, Zeta Omega chapter

September 2010-May 2013

Served as historian and treasurer. Completed 35 hours of service per semester. Managed finances for the organization. Organized a fundraiser.

### Sigma Pi Sigma

National Physics Honors Society

April 2012-present

Requirements for entry include being in upper-third of the class and completion of at least three semester of college course work in physics

# **Society of Physics Students**

President

September 2009-May 2013

As president, initiated rechartering of university chapter. Scheduled and presided over meetings. Organized end of the year luncheon and design and printing of t-shirts.

# **Employment Experience**

### Department of Physics, Baylor University

Office Assistant

January 2010-May 2013

Assisted with examinations and attendance for class of 300. Helped with departmental events and mailing.
